Suga Test Instruments Co., Ltd.

Manufacturing Div.

To all of our valued customers

Service life of SUGA products

We thank you very much for using SUGA products. This reminds you the importance of products service life and your safety use.

Your SUGA products service life does not expire?

If the products are used without periodical checks and/or proper maintenance, it will not be able to satisfy the performance and may eventually cause unexpected accidents as bellows;

1. Due to deterioration of electrical parts, wire and aging of safety devices, it may be occurred malfunction and abnormal operation.
2. Electric shock by weak insulation.
3. Due to aging of test chamber and piping components such as valves, water leakage.
4. Due to damage of upper lid and opening/closing mechanism of the test chamber, it will get caught or locked.

Please confirm the product service life in your manual, and if it is expired, ask your local agent or Suga Test Instruments Co., Ltd. to check the products status.

With periodical checks and proper maintenance, SUGA products can be used longer than the service life in the manual. But if your product is considerably exceeding service life without proper inspection or maintenance, please stop using it for your safety.

If you need support or consider purchasing new products, please contact your local agent or Suga Test Instruments Co., Ltd. without any hesitation.
